## Instruments Go Mobile

# What's New in **Cubasis 3.6**

**Cubasis**, our award-winning mobile DAW, lets you capture every moment of your inspiration on the go. Cubasis 3.6 adds four exciting, unique instruments, which are powered by Steinberg's HALion and will take your compositions to a whole new level.

Let your creativity flow while playing the beautiful LoFi Piano, create epic tracks with our all-new HALion Sonic Selection music workstation, explore FM synthesis in depth with our outstanding FM Lab-based Neo FM and FM Classics instruments.

Never miss a creative moment with Cubasis for iOS, Android and Chrome OS.

---

## LoFi Piano (Free)

Enjoy this outstanding instrument, which features uniquely beautiful LoFi piano sounds, which are perfect for musicians, producers and beatmakers. Based on an upright acoustic piano, recorded with carefully selected vintage gear, LoFi Piano provides you with a gritty blend of contemporary and vintage piano sounds, with the option to instantly tweak them to your taste via six simple effects.

## HALion Sonic Selection (Cubasis IAP)

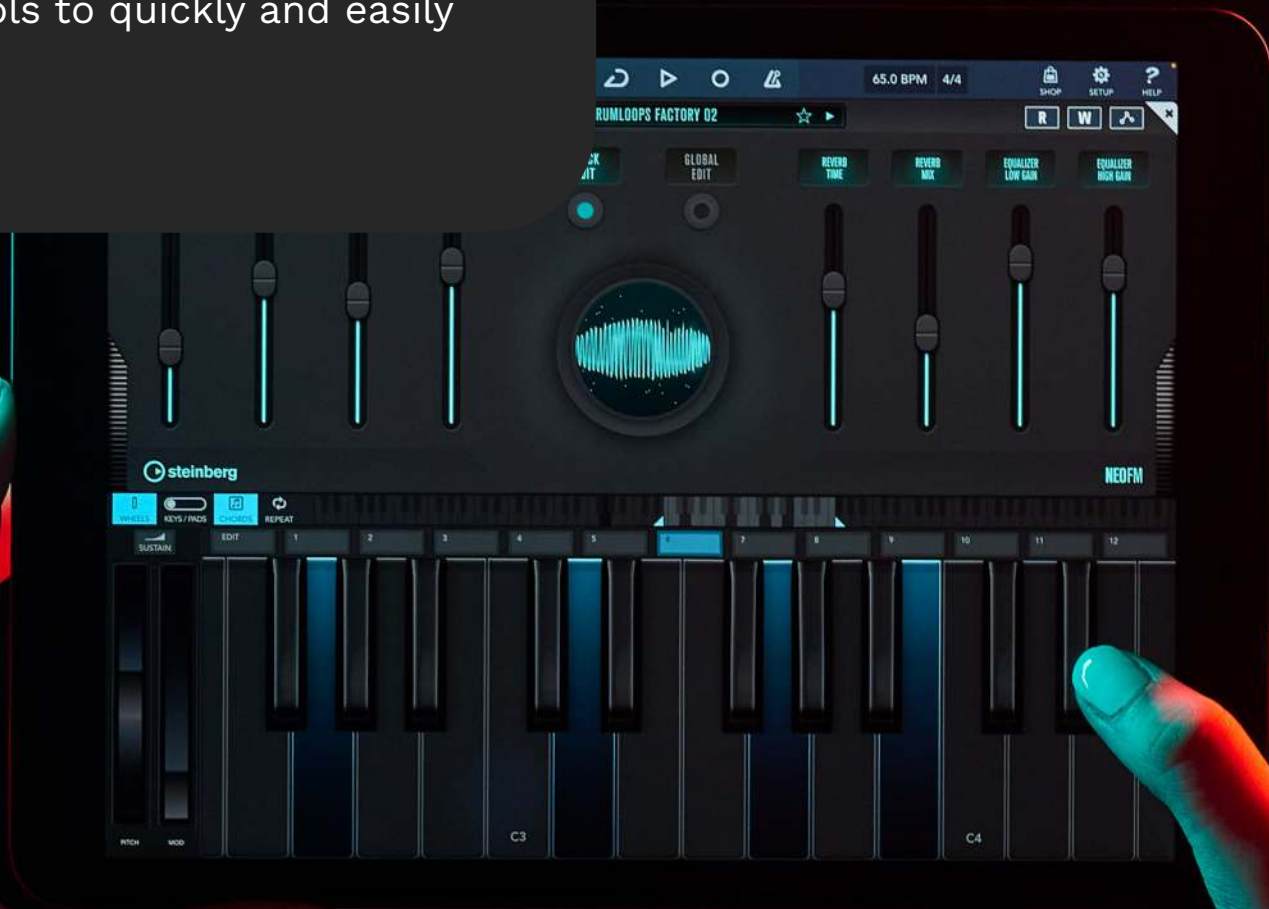

Create professional-sounding tracks on the go with HALion Sonic Selection, the ultimate music creation workstation for Cubasis. Be ready when inspiration strikes and choose your perfect sound from a cutting-edge XXL library of 1100+ world-class, pro-grade instruments, suitable for any genre. Instantly tweak your instruments sounds to perfection, via eight fast and easy-to-use controls.

iOS • Android

## Neo FM (Cubasis IAP)

Be inspired by playing this superb library of next-generation FM synthesis sounds, covering earth-shattering basses, crystal-clear leads, atmospheric pads, arpeggiated pulsating sounds, and much more. Neo FM is based on Steinberg's acclaimed FM Lab instrument and includes 300+ cutting-edge presets, each with eight intuitive controls to quickly and easily tweak your sounds.

iOS • Android

## FM Classics (Cubasis IAP)

Yamaha's legendary DX7 remains one of the best-selling synthesizers in history. Back in the golden 1980s there was hardly any worldwide chart-topper which didn't use at least one of the remarkable trademark DX7 sounds. Enjoy yourself playing all the classic DX7 and TX81Z factory sounds, which match the originals as closely as it's possible to get, paired with a beautifully crafted and easy to use DX-like user interface.

iOS • Android

## Improvements (Cubasis 3.6)

Cubasis lets you focus on instantly creating great tracks. Cubasis 3.6 brings many improvements to let you capture your ideas with ease. Do you prefer a darker environment, to make sure you are not distracted while being creative? The stunning new dark keyboard mode is just for you! Have you fallen in love with a great sound? Simply tap the star icon, making sure you will find it again, quickly and easily. And there's so much more. Whenever you are ready to create, Cubasis is ready too.

iOS • Android

## Additional Features and Improvements

### Arrange Window

---

- CBT-3560 Audio event fade-ins to less than 100% gain no longer crackle during the fading phase.
- CBT-3514 Fixes a random issue, where playing audio tracks while recording does not work as expected.
- CBT-3569 Fixes a rare problem, where the arranger view is not properly recalled after a project has been loaded.
- CBT-3504 Resolves an issue where manually time-stretching multiple events led to unwanted resizing results.
- CBT-3493 MIDI track names are now properly updated after reassigning an instrument.
- CBT-3537 Resolves a rare problem where drag and drop of an audio file from another iOS app rendered Cubasis unreliable.
- CBT-3505 Setup option added to permanently show the add/remove track bar above the track list.

- CBT-3533 Inspector now highlights the currently opened effect.
- CBT-2853 Resolves a problem with complex projects, where playback may lag when recording has stopped.
- CBT-2843 Auto-quantized notes at the cycle start are now properly recorded and played back.

## **Additional Features and Improvements**
